

DAMN FINE KEYBOARDS

WELCOME

What the heck is this. Well it's the first little 13-page issue of "DAMN FINE KEYBOARDS" a little ode to Twin Peaks (one of the best series ever) and mechanical keyboards so it's a grubby little booklet about keyboards. You will rightly ask yourself why you want to watch this when you already subscribe to the Keyboard Builders Digest (if you haven't done so yet, do it now: <https://kbd.news/> Tamás does a great job and the Keyboard builders Digest is a wonderful project). So what's the point of the Damn Fine Keyboards?

I love mechanical keyboards and I love working on projects. Besides my podcast (<https://www.clickclackhack.de>). I wanted to do something with more visuality instead of audio - and here is the result. A magazine full of beauties in the form of mechanical keyboards.

Thanks for all the folks who spend their photos for the first issue and thanks to Tamás (kbd.news).

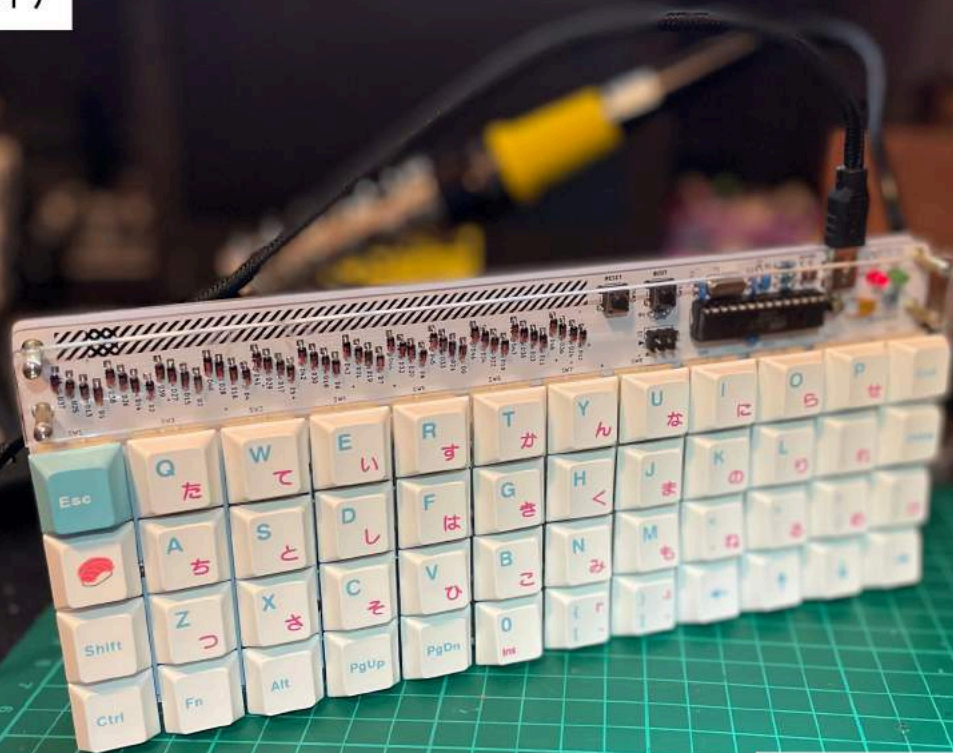

HOW DOES IT WORK

Put your keyboards in the right light and send me the photos. If you know any cool community projects let me know and I'll put them on the community page (in the back). If you think you can contribute something to "DAMN FINE KEYBOARDS" feel free to contact me. Maybe you want to write an article or a building-guide about your Keyboardproject or creating Keyboard-Art. How to reach me you will find everything on:
